

Clearly, a fitting solution

FitLife provides comfort for hard-to-fit patients.

The FitLife total face mask is a solution for patients who have difficulty wearing conventional masks or who simply prefer a clear line of sight.

Facial hair, dentures, nasal bridge breakdown, facial irregularities, and claustrophobia are issues that can greatly impact the ability to establish effective therapy and comfort. FitLife offers a solution for men and women facing these challenges. It quickly establishes a robust seal around the less pressure-sensitive perimeter of the face, while maintaining an unrestricted view. Easy-to-use snap clips and advanced headgear make application and removal straightforward. The large size of this “total solutions mask” fits most patients. The new FitLife is the latest way that we help you fit 100% of your patients, 100% of the time.
