

SO COMFORTABLE, SO SIMPLE, THE DIFFERENCE IS CLEAR!

Respironics Total™ Face Mask a unique alternative for patients requiring any form of non-invasive ventilatory support. The Respironics Total Face Mask is a new alternative for patients in hospital who have difficulty tolerating nasal masks using Respironics BiPAP or CPAP systems. It provides a fast, effective seal with no fitting and eliminates pressure sores caused by some nasal masks. As part of our Power Program for managing Disease, the Total Face Mask will help provide better patient care.

- Cost Effective
- One Size Fits All
- Extremely Comfortable

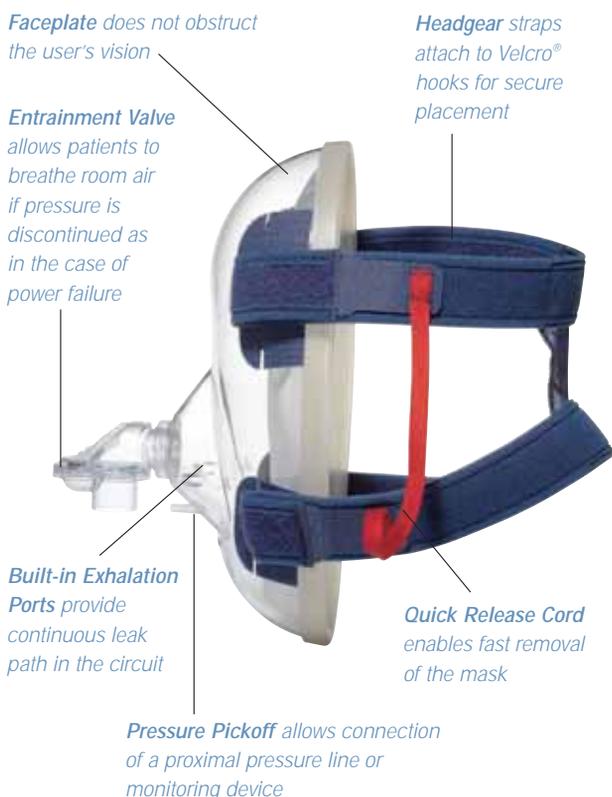

Respironics Total™ Face Mask

Respironics Total™ Face Mask

The easiest and most convenient way of delivering BiPAP and CPAP

The Total Face Mask is an interface for adult patients using Respironics BiPAP or CPAP systems in hospitals or at home. It is a comfortable alternative for patients who may not be able to obtain a good seal with a nasal mask, experience skin breakdown, or who are claustrophobic.

The most cost effective way of NIV delivery, as it is reusable on up to 10 patients

Because the Total Face Mask covers the entire face, there are no pressure points around the nose to cause sores or skin breakdown. An effective seal is created around the outside of the face as air pressure from the system inflates the soft, flexible sealing layer. This minimizes leaks while providing optimal airflow through the nasal passages. And because the air pressure is able to circulate throughout the mask, it allows more natural, comfortable breathing for the patient.

The built-in exhalation device can be used in conjunction with disposable circuits to provide an additional method of exhausting CO₂.

One size fits all

The Total Face Mask comes in one size with easy-to-use headgear that can be quickly fitted on most patients – an important advantage in critical care situations. Built-in safety features, such as an entrainment valve and quick release cord, give the care provider peace of mind.

Extremely patient compliant and very easy to put on

Respironics Total Face Mask comes with comfortable, easy-to-use headgear. Sturdy cloth side straps and a mesh crown strap keep the mask evenly and securely in place and helps to prevent mask leaks. Adjustable Velcro tabs on the straps attach to hooks on the faceplate of the mask for stable placement.

Made of clear plastic, the lightweight faceplate adds to the comfort of the Total Face Mask. It does not obstruct the patient's vision, which helps to minimize the feelings of claustrophobia that some patients experience.
